Summary

Web3 Developer with 2 years of frontend development experience, 1 year working with blockchain technologies, and 6 months of backend development. Proficient in building decentralized applications with a solid understanding of smart contracts, web3 integrations, and basic DevOps practices. Recognized with several awards for my contributions and dedication, I'm passionate about innovative technologies and continuously strive to enhance my skills while contributing to impactful projects.

Education

Ton Duc Thang University, Computer Network and Data communication   Sept 2021 – Present
- **GPA:** 7.88/10.0
- **Coursework:** OOP, Web Programming, .NET Technology, Android Programming, Data Structure and Algorithms, Software Engineering, Information Security, Requirements Analysis and Design.

Technical Skills

Programing Language:	Javascript, Typescript, Move, Rust, Java, CSharp.
Framework:	Reactjs + Nextjs, Expressjs, Axum, ASP.NET.
Platform:	Sui Move, Move Aptos, Near protocol, Solana.
Orthers:	Linux, AWS, Kubernetes, Git workflow.

Certificates

Apr - 2024	Agile Development & Scrum Framework (Tech Base VIETNAM)
Nov - 2022	2ND Web Create Portfolio (IT Faculty - TDTU)
Apr - 2024	2ND Design Game With Arcade (IT Faculty - TDTU)

Awards & Honors

Nov - 2024	1ST at Sui Hacker House Bangkok
Aug - 2024	University Award and Community Award at Sui Overflow Hackathon; Top 5 Remaining Shortlisted Teams at Sui Vietnam Hackathon
Sep - 2023	3RD Native track at Web3Hackfest
Sep - 2023	1ST at VBI-TDTU Blockchain Hackathon
Nov - 2022	2ND at Web create porforlio
Apr - 2022	2ND at Design Game With Arcade

Professional Experience

Sui Hacker House

Project: Suistack - Backend developer   Nov - 2024

- **Description**: A platform that empowers users to develop, build, deploy, and visualize smart contracts on the Sui network with ease. It streamlines the entire lifecycle from coding to deployment, while providing intuitive tools to interact with contracts through basic actions like minting NFTs, transferring assets, and more — all without complex setup.
- **Technologies**: Nodejs, Sui network, Mongodb.
- **Responsibilites**: Development

Sui Overflow Hackathon and Sui Vietnam hackathon

Project: Wecastle - Smartcontract developer   Aug - 2024

- **Description**: A onchain game interate with Sui network.
- **Technologies**: Unity engine, Reactjs, Nestjs, Mongodb, Sui network.
- **Responsibilites**: Development
- **Github**: github.com/Weminal-labs/wecastle-contract

Web3hackfest

Project: Wedata - Smartcontract developer   Sep - 2023

- **Description**: An on-chain platform for storing and trading data.
- **Technologies**: Reactjs + Typescript, Near protocol.
- **Responsibilites**: Development
- **Github**: github.com/phuquiivo03/wedata

TDTU-VBI Blockchain Hackathon

Project: Wecycler - Smartcontract developer   Sep - 2023

- **Description**: An on-chain platform for storing and trading data.
- **Technologies**: Reactjs + Typescript, Near protocol.
- **Responsibilites**: Development
- **Github**: github.com/phuquiivo03/Wecycler

Sui Overflow

Project: Deepsynth - Backend Developer   Feb - 2025

- **Description**: An AI-powered agent that simplifies DeFi interactions, enabling users to trade, place limit orders, stake assets, and track their portfolio effortlessly. The agent automates complex tasks, offers smart suggestions, and enhances user experience across multiple decentralized platforms.
- **Technologies**: Nodejs, Mongodb, Cetus protocols.
- **Responsibilites**: Development
